

RUSSIA

Over 450 young Members

Launched in 2012, CIGRE Russia NGN is a programme that aims to develop the next generation of power engineering professionals

Participants of the CIGRE Russia NGN have an opportunity to improve their professional level by interacting with the leading experts of electric power industry, to be engaged in the RNC CIGRE National Committees' activity and to present research results and practical achievements at the scientific and technical events of national and international levels.

Annually CIGRE Russia NGN holds more than **20 events**; the most significant are the following:

- International Scientific and Technical Conference “Radioelectronics, electrical and power engineering”
- International Scientific and Technical Conference “Power Industry: Viewpoint of the Youth”
- International Scientific and Technical Conference “Relay Protection and Automation”
- Moscow Student Competition on Theoretical Fundamentals of Electrical Engineering
- International Engineering Championship “CASE-IN”
- Thesis Competition for graduate students of electrical, electrical power engineering and ecology programs of study

Russian NGN CIGRE is one of the biggest groups worldwide and the key driver of the national power industry development. Thanks to the Russian NGN the industry is calm about its innovative and sustainable future. In my opinion, one of the greatest achievements of Russian NGN is tight connection of industry and higher educational institutions, which brings benefits for all the parties – highly qualified young professionals for industrial companies and unique educational and future employment opportunities for students.

Stanislav Eroshenko
NGN IEC Vice-Chair
