- 28/05/2021, Net Zero in the UK and China – Challenges and Opportunities, with **China NGN**, 2 speakers

Adam Middleton  
Chair: CIGRE UK

Since the creation of the first group in the UK NC in 2007, NGN has provided the impetus in our organization for change, development and new thinking. We count upon the global NGN community to drive our association forward into its second millennium as our industry embraces decarbonization, digitalization, decentralization & the Energy Transition.
